ILKW BY

ILKWANG LIGHTING

Founded in Daegu, South Korea, in 1962, ILKWANG LIGHTING is a lighting brand that has produced incandescent bulbs for over 60 years. Much like the incandescent bulb that has illuminated our daily lives from up close, ILKWANG LIGHTING has long contemplated the essence of light and the way people live. Today, this accumulated manufacturing expertise, craftsmanship, and profound understanding of light form the cornerstone of ILKW's design philosophy.

With the end of its final incandescent bulb production in 2022, ILKWANG LIGHTING transitioned from a light source manufacturer into ILKW, a lifestyle lighting brand focused on light fixtures. Based on the principles of 'Long-life Design' and 'Affordable Luxury,' we offer universal and sustainable lighting that can be used and loved across generations. Furthermore, rooted in an understated Korean aesthetic and a relentless commitment to product integrity, we strive to create lighting that grows in depth over time.

The signature SNOWMAN Series, with its simple structure connecting two soft circular shapes, symbolically represents the sense of form and light that ILKW pursues. Formed as a single shape—as if blown up like a balloon—and engineered with a unique light scattering structure for the internal LED source, it delivers soft, uniform light without any shadow interference. Even during the day when the light is turned off, it naturally blends into the space like a sculptural objet. Starting with a table lamp in 2021, the SNOWMAN Series has now expanded to 17 models. ILKW offers around 20 diverse lighting collections, including portable, table, floor, pendant, and ceiling & wall lamps.

ILKW's products can be found in various design stores and lifestyle spaces across eight countries worldwide, including South Korea, MoMA Design Store New York in the US, ACTUS and LIVING MOTIF in Japan, and PRINTEMPS in France.

Seoul Living Design Fair
2014 – 2026

Since 2014, ILKW has consistently participated in the Seoul Living Design Fair, introducing new products and shaping its brand direction through direct communication with customers. The signature SNOWMAN Series grew directly from these experiences and the feedback gathered along the way. While many exhibitions in South Korea are centered around on-site sales, ILKW has continuously curated intimate exhibitions that introduce new products while sharing its perspective on light, structure, materials, and the way things are used.

Held annually in Copenhagen, 3daysofdesign is Europe's largest design event, bringing together designers, brands, and design enthusiasts from around the world — a festival in which an entire city unfolds as one grand exhibition space. Three brands that have each defined Korean living in their own way come together as one. Portrait of Korean Living, a collaboration between rareraw, flat point, and ILKW, is an exhibition that captures the attitude and sensibility of Korean living brands in a single scene. Set against a scenography drawn from the landscapes of Seoul, each brand's structures, light, and objets are brought together.

Date : 2026.6.10 - 6.12 / Site : tage Projects, Borgergade 15E, 1300 Copenhagen
Exhibition Title : Portrait of Korean Living

2025 Salone del Mobile
Euroluce

Having expanded steadily through domestic exhibitions, ILKW has been returning to Milan, Italy every year since 2019, in search of broader markets and new benchmarks. By experiencing firsthand the exhibitions, spaces, products, and operations of world-renowned lighting and living brands, ILKW has been charting its course as a global brand. In 2025, ILKW presented its first international exhibition at Salone del Mobile, Milano — Euroluce. Centered around the signature SNOWMAN Series, the exhibition introduced the sense of light and form that ILKW has long pursued. More than an international debut, it marked a pivotal turning point — one that affirmed the brand's potential and the direction ahead.
